- Recycled Plastic Pallets
- Industrial Simulation Solutions
- Stock Orders

Sustainable. Clean. Responsible.

Reduce your carbon footprint while optimizing logistics with recycled plastic pallets. Stronger and longer-lasting than wood, they resist moisture, shocks, and repeated handling while ensuring perfect hygiene for sensitive environments.

Their light weight make them ideal for international transport and automated warehouse systems — reducing handling time, waste, and breakage. For more details or a customized quotation, contact our team!

Training and Innovation

These next-generation simulators reproduce real-life scenarios — from equipment operation to emergency procedures — allowing teams to train safely, efficiently, and without production downtime. By combining high-fidelity environments with realistic process control

and fault simulation, they help operators sharpen reflexes, improve diagnostic accuracy, and strengthen coordination between field and control room personnel.

For more information about our industrial training and simulation solutions, contact our technical team.

Plan Ahead and Stay Operational

Year-end is the perfect time to plan your preventive maintenance and replenish your strategic stock.

Shutdowns, scheduled inspections, and major servicing are coming — make sure your teams have everything they need when the time comes: filters, belts, seals, spare parts, and workshop consumables.

Afrikan Appro supports you at every step, helping you define your preventive maintenance lists, identify critical parts, and anticipate supply lead times that often stretch during the first quarter.

With our wide supplier network and regional stock capabilities, we help you secure your supply chain, limit emergency shipments, and reduce unexpected downtime.
