### New Cotton Geological Sample Bags

We are excited to introduce our durable cotton geological sample bags (12"×18") with custom numbering tags and prints, designed for mining exploration across Africa. Each bag is crafted from breathable, reusable canvas with double-stitched seams and a secure drawstring, ensuring sample integrity during transport. We print sequential or custom codes (numeric, alphanumeric, barcodes/QR codes) and can include your logo or project fields on each bag.

Contact us with your numbering scheme and label preferences to receive a quote and mock-up approval for timely delivery to your site.

### Upcoming Visits: Europe Supplier Tour

In July, Afrik Appro will be visiting key suppliers in Switzerland, France, the Netherlands, and Italy. If you are based in or near these regions and would like to discuss sourcing opportunities, new partnerships, or ongoing projects, please reach out to organize a meeting. We'd love to connect in person to better understand your needs, explore collaboration possibilities, and strengthen our supply chain relationships.

Contact us soon to schedule a visit during our European trip and let's explore how we can work together.

## High-Pressure Hydraulic Solutions

We are excited to introduce our high-pressure hydraulic product range, featuring cylinders, couplers, manual and hydraulic pumps, THP hoses (700/1200/2000 bar), and Waterblast equipment. Designed for the most demanding industrial applications—heavy maintenance, lifting, cutting, and pressure testing—these tools deliver exceptional strength, precision, and safety. Afrik Appro partners with leading brands to supply reliable solutions tailored to field requirements.

Contact us to discuss your specifications, arrange demonstrations, or request a custom kit. Elevate your operations with optimal hydraulic performance!
